

TRADE CONNECTION RAILS

with patented* INSTANT Centre-Left-Right Connection

INNOVATIVE TRADE RAILS OF UNCOMPROMISING QUALITY

Contractor

Domestic

Hospitality

- This new range was developed after extensive discussions with Contractors, Specifiers and the Hospitality Industry who required a rail with simple fast installation, universal cord connection, quality design and a 10-year warranty from a trusted brand.
- Trade Connection rails offer exclusive time and labour saving features and high standards of quality and excellence – at a competitive cost.
- Every mirror polished Trade Connection rail is laser cut and is fully welded for extra strength and to prevent rusting from the inside which happens with cheaply made 'tack' welded rails.
- Demand Serene Trade Connection Towel Rails from your local Electrical Wholesaler and start saving on time and money with on your Towel Rail installs.

TRADE CONNECTION

A mirror polished fully laser welded rail with instant Centre Left or Right fixing.

WALL MOUNTED BRACKETS

Designed by our engineers to be extra strong and fast to install. The cord can be fully concealed and the brackets are 15mm longer than standard to easily accommodate extra thick towels.

MIRROR FINISH

Our polishing process provides a seamless and elegant mirror finish. A splendid addition to any bathroom.

CORD MANAGEMENT SYSTEM (CMS)

Our new patented system delivers instant Left, Right or Centre fixing without the need for tools, kits or time consuming packs of parts.

FLAT-FACE ROUND DESIGN

The simple modern shape and balance of these Serene rails make them suitable for large or small bathrooms and also perfect for smaller hotel style en-suites.

FULLY WELDED STRENGTH

To deliver a lifetime of continuous performance ladder rails need to be strong which is why all Serene rails are fully welded. Our competitors 'tack' welded rails can break under load and tend to rust from the inside out as moisture gets into the weld.

WE LISTENED!

Contractors told us that they needed an attractive high quality universal fitting rail, and that they would prefer to have less packaging waste to dispose of. The result is the TRADE CONNECTION range, simple to fit with great features, and packed 3 to a box.

With substantial savings on bulk purchases.
